Objective:

Aspiring Information Technology student seeking practical industry experience and the opportunity to enhance skills from professionals in the field.

EDUCATION:

2021 - Current (3rd year)

Bachelors in Information Technology

Bahria University

2019 - 2020

Intermediate in Pre-Engineering

Bahria College

2017 - 2018

Matriculation in Computer Science

Bahria Model School

CERTIFICATES:

- Foundations of User Experience (UX) Design

- Programming for Everybody (Getting Started with Python)

- Introduction to Front-End Development

ACADEMIC PROJECT EXPERIENCE:

Research Paper on Sensor Robotics

- Explored how sensors are installed in robots, making tasks easier for humans.
- Addressed problem-solving aspects in robotics.

Traffic Light Simulation through Arduino

- Developed a virtual instrument for controlling street traffic lights using Arduino.
- Implemented real-time traffic simulation.

Database for a Florist Shop

- Designed and implemented a database system using SQLPlus for a florist shop.
- Managed data efficiently and securely.

SKILLS:

- UX/UI Designing
- SQL (Database Management)
- Frontend (Web Design)
- WordPress Development
- Problem-solving skills

INTERESTS:

- Exploring new technologies
- Coding and programming
- UX/UI design
- Web development
